Cognizant Experience

Merck Japan to Cornerstone Dev Developer- 2 Years & 2 Months (Feb 2022 – Apr 2024)

Project Description

The Integration SWAT Team Deployment project is a strategic initiative aimed at establishing a specialized team with rapid-response capabilities to address and optimize complex integration challenges within our organization. The project focuses on deploying a dynamic and agile SWAT team that specializes in the seamless integration of diverse systems, applications, and technologies. We are responsible for moving data from the source to Veeva. We worked on around 35 interfaces, developed to move the data into UAT, tested, and deployed it in production. Collaborating closely with cross-functional teams, stakeholders, and end-users to gather integration requirements, we maintain transparent communication channels to ensure a shared understanding of integration objectives. The Integration SWAT Team Deployment project aims to deliver the following outcomes: Accelerated resolution of integration challenges. Improved efficiency and reliability of integrated systems.

Roles & Responsibilities

Implement integration solutions using cutting-edge technologies and tools. Troubleshoot complex integration issues and provide rapid resolutions. Collaborate with cross-functional teams to understand integration requirements. Implement and enforce agile practices to ensure adaptability and responsiveness. Facilitate agile ceremonies, including sprint planning and retrospectives. Foster a culture of continuous improvement within the SWAT team. Create detailed documentation on integration processes, configurations, and best practices. Organize regular knowledge-sharing sessions within the SWAT team. Ensure that knowledge is effectively disseminated across the team. Coordinate the deployment of integrated components into various environments. Collaborate with operations teams to ensure smooth production releases. Implement deployment best practices and ensure minimal downtime. These roles and responsibilities collectively ensure the success of the Integration SWAT Project by combining leadership, technical expertise, quality assurance, documentation, communication, and deployment coordination. Each role contributes to the project’s goals of efficient, seamless, and reliable integration within the organization.

Career Highlights

I received a promotion appreciation email and received favorable ratings from my home manager for demonstrating excellence in delivery.
